

Kiss my ass

A tricky venture I am planning here. But no Lauren news around (it's like sitting in the desert of Gobi and waiting for rain – Huston, we have a problem) I have to change the course of action here.

New pictures were released from the film "BISS" and indecently an animated discussion started.

Her's or not her's, that is here the question?

Yes, we are talking about Lauren's backside, the end of the spine, her butt! (Who starts feeling an unpleasant emotion while reading this, I recommend, better stop, because I know me and maybe this horse is going wild today. As a precaution I rate this text "only for persons over 25 years" and I am on the right side of the road ☺)

To be honest, I don't know, if this is Laurens butt and frankly, I would feel freaky, if I could answer it to you.

But let me think loud: as Lauren said several times, her greatest fear would being topless in public, the conclusion to our dilemma here is, it is not her butt we are seeing on the big wide screen.

Remember: there is no city in the world than LA, that is full with body doubles: hand, foot, hair nose. I heard there are now people, who became brain doubles to Paris Hilton and Britney Spears.

But we left the path and Laurens butt. Not following the questions, if this picture could be her butt while comparing her wearing tight jeans and the CW-Press tour.

So let's have a little excursion: the human butt!!

In latin: "podex", seeing it from a biological view (and only this way) the hip of a woman is more squarely built than men and can put much more fat in the tissue (thank you Koile for remembering us).

More: the thigh bone is not parallel to the spine, but more bended. The result: the "typical woman walk - jiggle with the hip", means the butt slams from the left to the right and back.

Don't think I came up with this by myself; I used an encyclopaedia to get the definition (but to be honest, not really new information).

Well, the butt of a lady! It caused war – the unplumbed depths of men souls.

In the Greek antique men praised a well built butt of a person and for example people worshiped Aphrodite, also known as Kallipygos, which means „the one with the beautiful butt“. Today this woman is called Jennifer Lopez, you see, the times are changing. Or not!

Even Zeus, the old ladykiller adored Ganymed (which was in this case a boy) because of his very well built back. Some things never change!

So I assume it is not Lauren`s butt, but here is the deal: the one, who finds out write an email to me. As long as we are not sure, we have to speculate or have a long intense look.

Fake or not, viva la butt!
